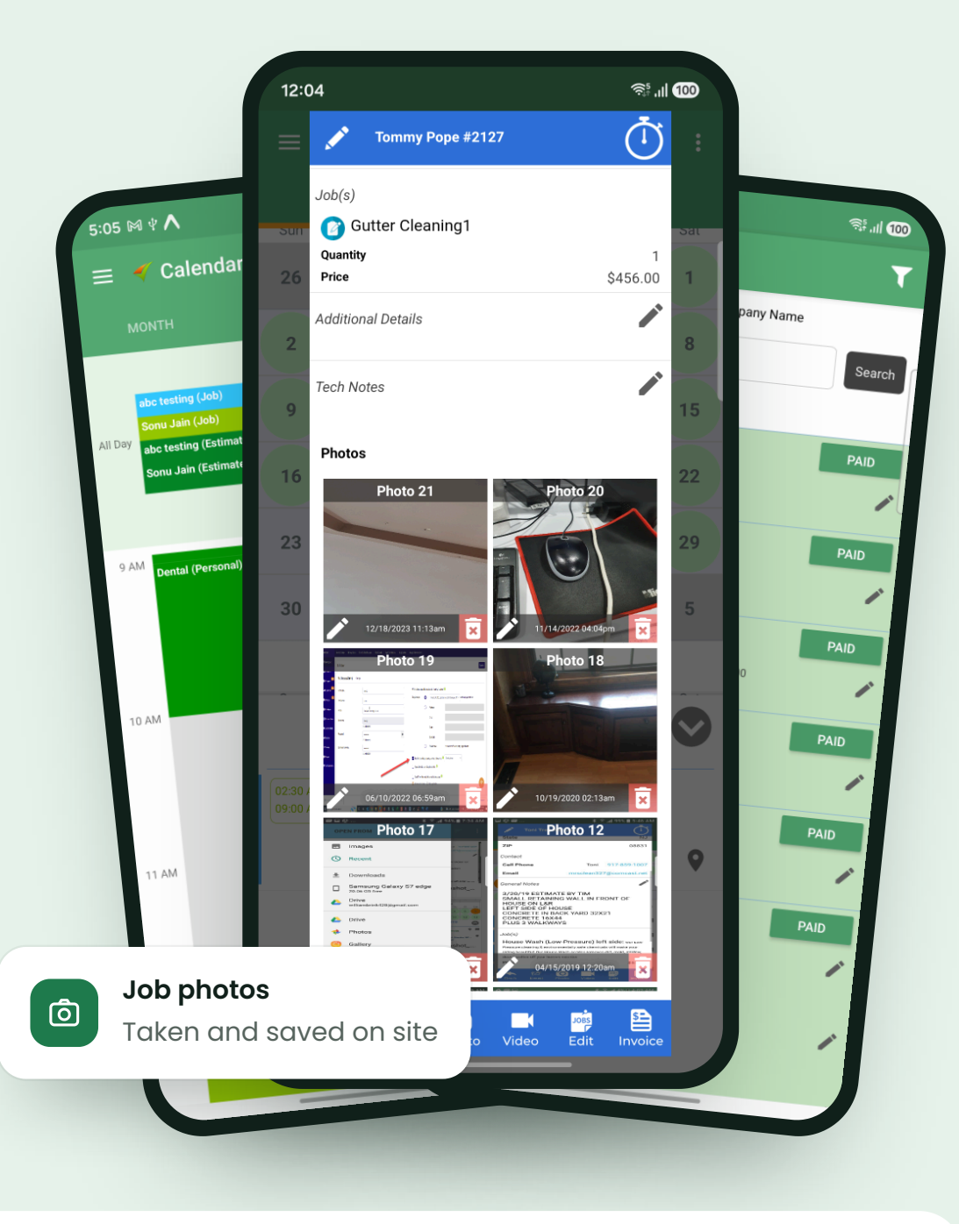
The Customer Factor | Field service software

Quote to QuickBooks, in one app.

Scheduling, estimating and invoicing software for small service businesses and the crews who do the work.

- Recurring jobs
- Job timer
- Card payments
- Customer portal



Job photos
Taken and saved on site

4.4/5 ★★★★★	10K+	Web + mobile
17 verified reviews on Capterra	Android installs on Google Play	Office on the web, crews on mobile

A service business runs on four tools that don't talk.

A small window cleaning company still has to quote, schedule crews, bill, get paid and keep the books. Usually that means a paper diary, a typed estimate, a card reader and an evening re-typing it all into QuickBooks.

The usual way

- ✗ Repeat customers tracked in a paper diary
- ✗ Estimates typed from scratch every time
- ✗ Crews get the day's jobs by phone or text
- ✗ Invoices written one by one after the work
- ✗ Every sale typed again into the books

With The Customer Factor

- ✓ Jobs wait in a pool, then drag onto a day
- ✓ Estimates built from saved templates
- ✓ Jobs show up in each crew's app
- ✓ Bulk invoices; saved cards pay repeat work
- ✓ Sales flow into QuickBooks, no retyping

One record for the whole business.

The Customer Factor keeps a service company's customers, jobs, prices and payments together, so the same details are never typed twice.

It's built around repeat visits, which is why it fits trades where the same customers book again and again:

- Window cleaning
- Pressure washing
- Carpet cleaning
- Maid & cleaning services

Built across three surfaces.

The office, the crews and their customers each get a view built for what they do.

Web app

Where the owner plans, prices and bills.

- ✓ Drag-and-drop scheduling
- ✓ Employees and crews
- ✓ Service plan pricing
- ✓ QuickBooks Online or Desktop

iOS & Android apps

The day's work for crews, with the paperwork done on site.

- ✓ Jobs, estimates and tasks
- ✓ Time tracking per job
- ✓ Invoices from the phone
- ✓ Clock in/out and mileage
- ✓ Expense receipts filed on site

Customer portal

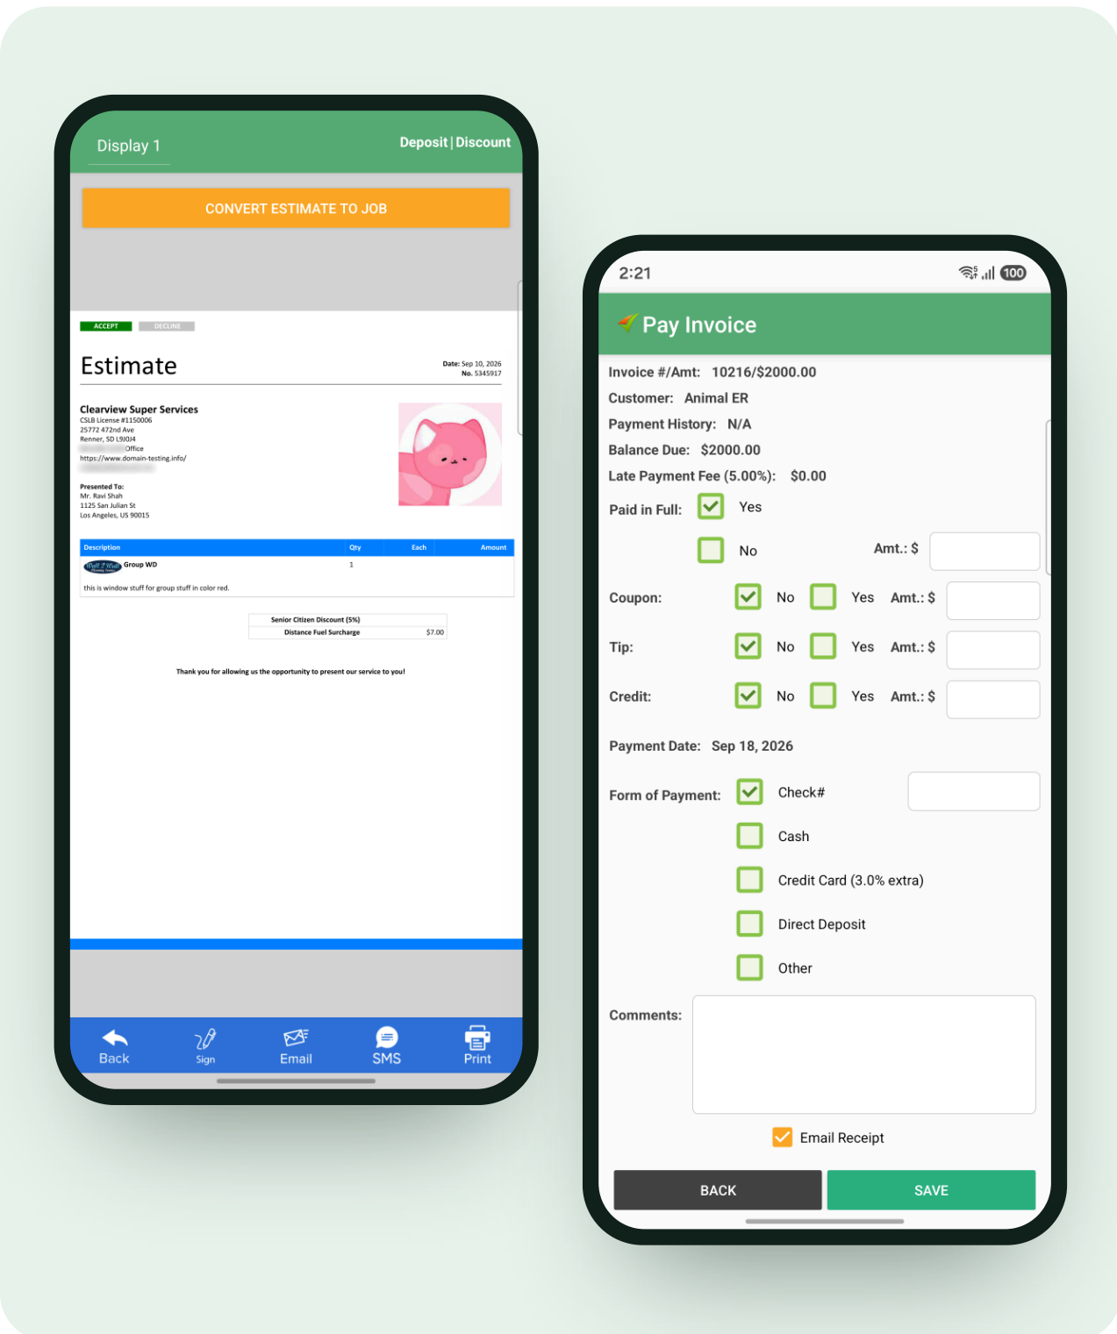
Where customers ask for work, inside rules the owner sets.

- ✓ Bookable days and services
- ✓ Past jobs and pricing
- ✓ Automatic email and text

How a job works, start to finish.

One window-cleaning customer, followed through the product.

1. **Send the estimate**
   The office picks a template, adjusts the line items and sends it to the customer by text or email.
2. **Put it in the job pool**
   Once approved, it becomes a job: one-time, or repeating on a set frequency.
3. **Drag it onto the schedule**
   When it's due, the job is dragged onto a day and assigned to an employee or a crew.
4. **Do the work and track the time**
   The crew sees the job in the iOS or Android app and tracks time against it on site.
5. **Invoice and get paid**
   The invoice is paid on the spot by card, check or cash, or a saved card is charged for repeat work.
6. **Land in the books**
   The payment flows into QuickBooks with the rest of the day's work.



Invoice #/Amt: 10216/$2000.00
Customer: Animal ER
Payment History: N/A
Balance Due: $2000.00

Form of Payment: ☑ Check# ☐ Cash ☐ Credit Card (3.0% extra) ☐ Direct Deposit ☐ Other
Comments:
☑ Email Receipt

An estimate becomes a job in one tap; the invoice is paid on site.

The product in action.

Four screens that carry a visit, from the first minute on site to getting paid.

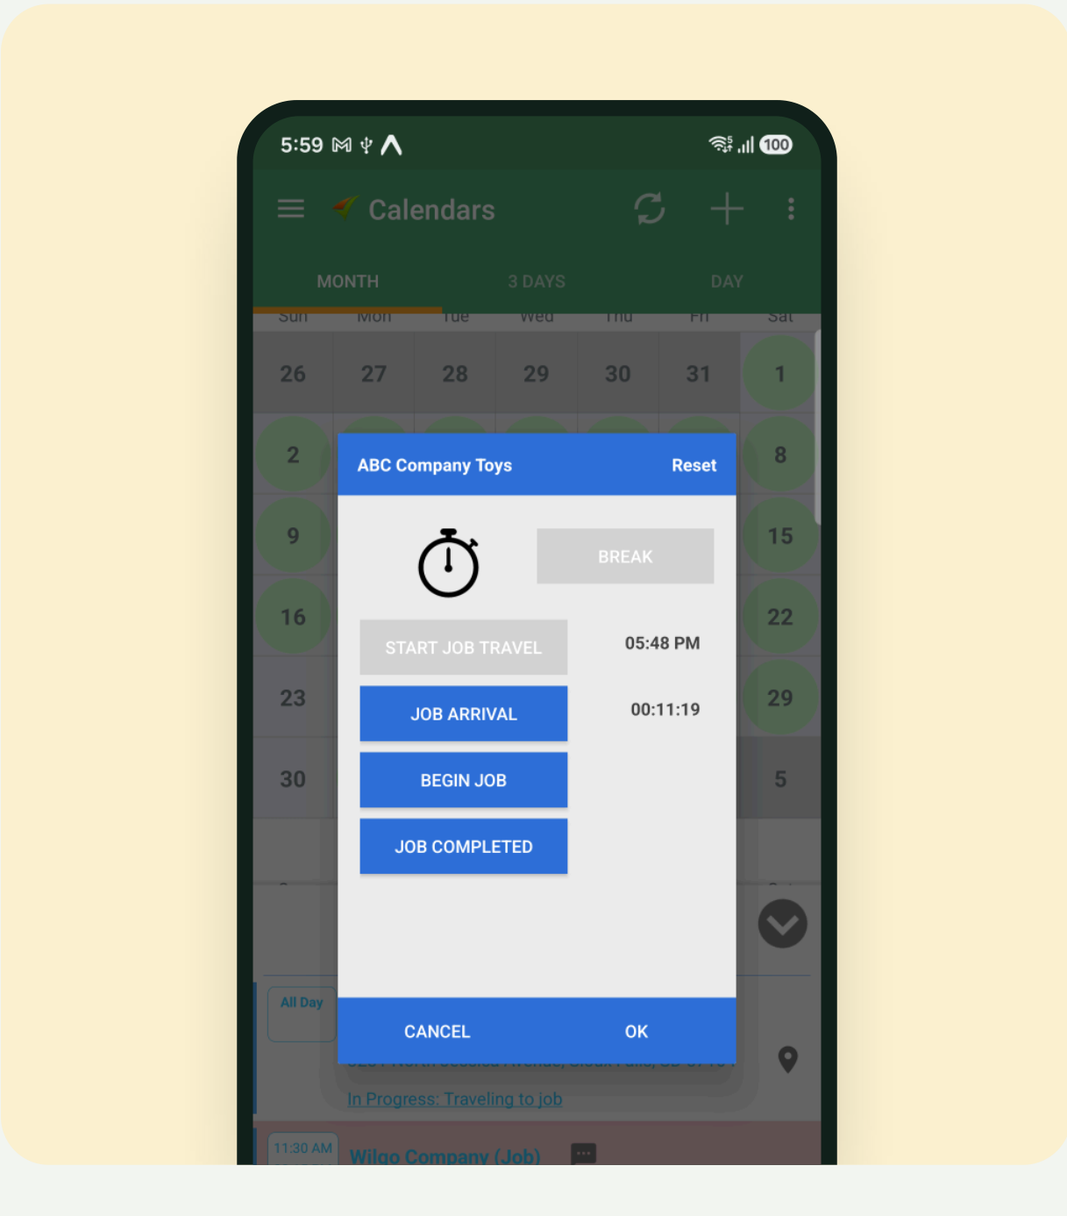
Everything about the visit, on one screen.

The crew opens a job and has the customer, the place and the history in front of them.

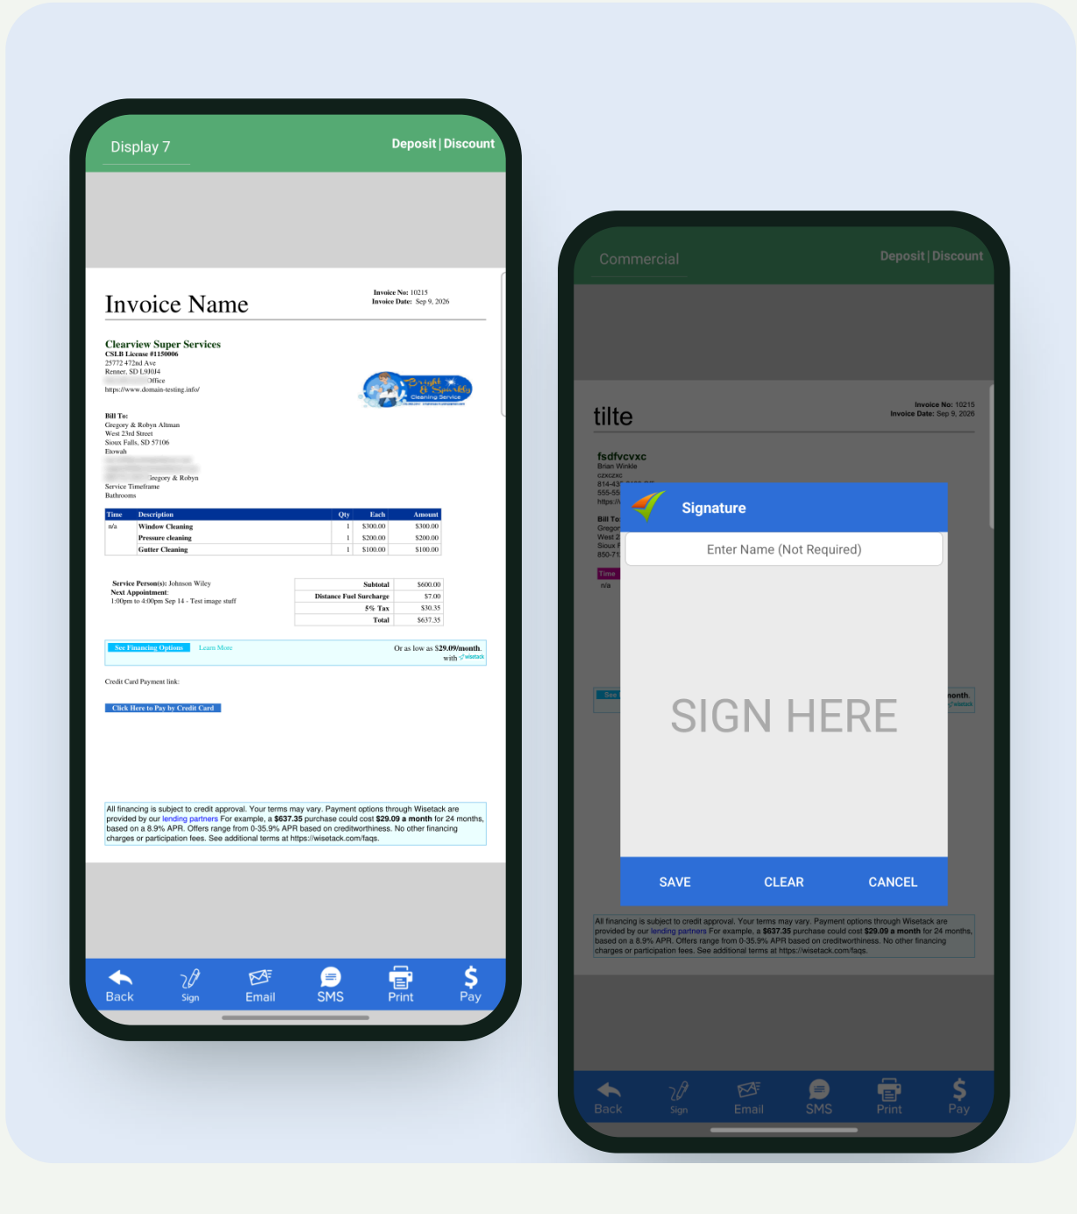
- ✓ Address, phone, email, job type and time
- ✓ Status set to open, completed or cancelled
- ✓ Notes stamped with who added them and when
- ✓ Email, photo, video and invoice from one bar



Every stage of a visit, timed.

One tap per stage builds an accurate record of the day, without anyone filling in a timesheet.

- ✓ Travel, arrival, start and finish taps
- ✓ A break button that pauses the clock
- ✓ Elapsed time shown against the job



Billed and signed before leaving the driveway.

The invoice is generated from the job, and the customer signs on the same phone.

- ✓ Invoice built from the job's line items
- ✓ Sign, send, print or charge from one bar
- ✓ On-screen signature, name optional

The table below lists recent charges to your account. Select the charge(s) you wish to pay, then click **Continue** to pay with your credit card.

☐ Date	Status	Amount	
☑ 09/10/26	Due. Thank you!	$658.38	View
☐ 06/07/24	Deposit is due. Thank you!	$103.30	View
☐ 06/07/24	or Pay in Full!	$839.62	
☐ 10/26/25	Due. Thank you!	$123.30	View

Customers pay from a link.

Open charges go out as a payment page carrying the service company's own name and logo.

- ✓ Charges with date, status and amount
- ✓ Customers tick what they want to pay
- ✓ Payment completed by credit card

Every screen, in depth.

The rest of the app, grouped by what each part of the business does in it.

Technically, what makes it interesting.

What sits underneath the screens, and what it saves a service business every week.

Repeat work that schedules itself

Each job keeps its own frequency and price. When it's due again it comes back ready to schedule, so no repeat customer is forgotten.

Real hours, without timesheets

Crews tap travel, arrival, start and finish on each job, and clock-ins and routes are logged per employee, so the owner sees real hours worked.

One job record for everyone

The office, the crew's app and the customer portal all use the same job. Customers only see what the owner chooses: bookable days, services, past jobs and prices.

Books that stay up to date

Works with QuickBooks Online and QuickBooks Desktop, with the sync included in the subscription. Card payments and email and text messages are built in, so nothing is typed twice.

Customers, invoices, payments — The Customer Factor → Automatic, every morning at 3:00 am → **QuickBooks Online** — Cloud sync

Customers, invoices, payments — The Customer Factor → When the user chooses, about 3 clicks → **QuickBooks Desktop** — User-triggered sync

What users say.
