# From first quote to QuickBooks, in one app.

Scheduling, estimating and invoicing software built for small service businesses: window cleaners, pressure washers, carpet cleaners and mold services. Here's how it works, and what goes into building something like it.

The Customer Factor · Web, iOS & Android

- Recurring jobs
- Estimates by text
- Route planning
- QuickBooks sync
- Crews
- Customer portal

**4.4/5**
Capterra, Dec 2025 (7 verified reviews)

**10K+**
Monthly installs on Google Play

**QuickBooks**
Two-way sync included in the subscription

**3 surfaces**
Web, iOS and Android, from one shared customer portal

## A service business runs on four tools that don't talk.

A crew can window cleaning company still has to quote, schedule crews, collect hours, bill, collect, and chase. Stacked, they usually that means a paper diary, a typed estimate, a card reader and an evening re-entering everything into QuickBooks.

### The usual way

- Recurring customers live in a diary, and someone has to remember who's due this month.
- Estimates are typed from memory and emailed as attachments.
- Crews get the day's jobs by phone call or text
- Invoices are written one by one after the work is done.
- Every side is entered a second time in the accounting software.

### With The Customer Factor

- Recurring and one-time jobs exist in a job pool and are dragged onto the schedule.
- Estimates are built from templates and go out by email or text.
- Jobs are assigned to an employee or a whole crew, and show up on their app.
- Invoices are created in bulk, saved cards can pay recurring work automatically.
- Sales flow into QuickBooks Online overnight, or thereby is a few clicks.

## Quote, schedule, invoice and sync, without retyping.

The Customer Factor, made by The Customer Factor LLC of Sioux Falls, South Dakota, keeps a service company's customers, jobs, prices and payments in one record. The office plans the week on the web, crews work from iOS and Android in the field, and customers can read their next visit through a portal.

It's built around repeat visits: recurring jobs come back into view when they're due.

- Window cleaning
- Pressure washing
- Carpet cleaning
- Mold & cleaning services

## Built across three surfaces, each.

The same customer, job and price list shows up in three places, each shaped for the person using it.

For the office

### Web app

Planning, pricing and billing.

- **Drag-and-drop scheduling** from the job pool
- **Bulk invoicing** for the week's work
- **Employees and crews** that jobs are assigned to
- **Service plan pricing** for repeat work

For the crew

### iOS & Android apps

The day's work in a pocket, with the paperwork done on site.

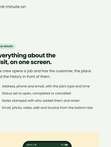

- Schedule, **job, estimate, team** and personal appointments
- **Time tracking** for each job
- **Invoice generation** on completion
- **Client list**, with daily route and mileage tracking
- **Expense receipts** photographed and filed on site

For customers

### Customer portal

Customers ask for work themselves, make rules the owner sets.

- Owner picks **which days** can be booked and **which services** can be requested
- Customer **requests your jobs and pricing**
- Sends an **automatic email and text** after each request, with editable wording

An estimate becomes a job, a job a visit, and a visit a paid invoice.

## How a job works, start to finish.

One window-cleaning customer, followed through the product.

1. **Send the estimate**
The office picks a template, adjusts the line items and sends it to the customer by text or email.
2. **Put it in the job pool**
Once approved, it becomes a job: one-time, or repeating on a set schedule.
3. **Drag it onto the schedule**
When it's due, the job is dragged onto a day and assigned to an employee or a crew.
4. **On the work and track the time**
The crew sees the job in the iOS or Android app and tracks time against it on site.
5. **Invoice and get paid**
The job is invoiced in bulk with the rest of the week, and charged to a saved card if there is one.
6. **Land in the books**
The sale reaches QuickBooks Online at 3am the next morning, or Desktop on the next manual sync.

## The product in action.

Four screens where the app does the heavy lifting, from the first minute on site to getting paid.

Job details

### Everything about the visit, on one screen.

The crew opens a job and has the customer, the place and the history in front of them.

- Address, phone and email, with the job's type and time
- Status set to open, completed or canceled
- Notes stamped with who added them and when
- Email, photo, video, edit and invoice from the bottom bar

Job timer

### Every stage of a visit, timed.

One tap per stage builds an accurate record of the day, without anyone filling in a timesheet.

- Start travel, job arrival, begin job and job completed
- A break button that pauses the clock
- Elapsed time shown against the job

Invoice and signature

### Billed and signed before leaving the driveway.

The invoice is generated from the job, and the customer signs on the same phone.

- Invoice built from the job's line items
- Sign, email, text, print or take payment from one toolbar
- Signature captured on screen, with an optional name

Online payment

### Customers pay from a link.

Open charges go out as a payment page carrying the service company's own name and logo.

- Recent charges listed with date, status and amount
- Customers tick what they want to pay
- Payment completed by credit card

Screens from The Customer Factor's Android app, captured on a test account.

## Every screen, in depth.

The rest of the app, grouped by what each part of the business does in it.

### Customers

**Customer search**
Find any customer by name, phone or address

**Customer details**
Contact and address

**Photos & documents**
Keep job evidence

**Current jobs**
Open and active

**Custom fields**
Gate codes, pets, notes

### Scheduling & jobs

**Month calendar**
The whole crew's week

**On-hold jobs**
Waiting on a call back

**Repeat frequency**
Weekly, 4-weekly, 8-weekly

**Add a job**
Date, time and address

**Job history**
Past visits and estimates

### Estimates & billing

**Estimates**
Jobs awaiting acceptance

**Unpaid invoices**
Still owed, overdue

**Line items**
Quantities and prices

**Email a proposal**
Send a estimate for approval

### Messages & checklists

**On the way**
Tell the customer you're coming

**Email templates**
Reminders and proposals

**Text templates**
Quick replies by text

**Job checklist**
Tick off the day's jobs

**Tasks**
Your business to-dos

### Field tools

**Dashboard**
Everything one tap away

**New appointment**
Job, estimate, task

**Job mode**
Photos, video, PDFs

**Expense receipt**
Photo, category, vendor

**Personal time**
Blocked on the calendar

## Technically, what makes it interesting.

The hard parts of this kind of product aren't the screens. They are the rules underneath them.

### Recurring work as data, not reminders

A job can repeat weekly, every two weeks or monthly, with a starting frequency, service plans and pricing attached. The next visit is the work resolved on its own.

### Field data the office can trust

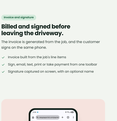

Travel, arrival, start and finish are timed against each job, and clock-ins and daily routes are logged per employee. The office sees what happened on site without having to ask.

### One record, three audiences

Owners, crews and end customers work from the same job. The portal shows customers only what the business has chosen to share, and services, past jobs and prices.

### Two roads into the same ledger

The app connects to QuickBooks Online and QuickBooks Desktop, and lets the business choose at the subscription. Card processing and customer email messaging are built in as well.

## What users say.

Feedback from verified Capterra reviews, the good and the honest.

**4.4**/5

★★★★☆

Capterra, 7 verified reviews, 14 Nov 2025 – 17 Mar 2026 · 5 star rate

| | |
|---|---|
| Value for money | 4.3 |
| Features | 4.4 |
| Ease of use | 4.4 |
| Customer service | 4.7 |

"As affordable and customizable for our type of business as any alternative."

Window cleaning business owner, verified review on Capterra

**Where a next version could go further**

- **Recognition and search.** The most common complaint in reviews is that records are hard to find.
- **Onboarding.** Several reviewers suggested guides note it isn't built in, which matters for a product a business owner doesn't control.
- **Message delivery.** One reviewer reported client emails not always arriving, a case for delivery tracking.

## Available on the web, iOS and Android.

**Web app**
Open in any browser for the office: scheduling, estimates, invoicing and settings.
thecustomerfactor.com

**iOS**
Install from the App Store for the crew in the field.
Requires iOS 15+

**Android**
Install from Google Play for the crew in the field.
